PERFORMANCE PLUS™ | ENGINEERED HARDWOOD

Superior Durability for Everyday Life

The ultimate in dent resistance, Performance Plus is up to 2X harder than traditional hardwood. By filling in gaps in the wood cells with acrylic, even softer species are made hard enough to withstand life in an active home.

GREAT FOR BUSY HOUSEHOLDS

The patented acrylic infusion process fills in the gaps in the wood cells with acrylic, making even soft species, like Cherry and Walnut, harder than Oak.

BEAUTY SHINES THROUGH

The Hartco Lifetime Finish, enhanced with nano particles, creates a powerful layer of scratch protection without clouding the beauty of the hardwood beneath.
